Spring Semester Survey FAQs

I want my child to move from blended to virtual or virtual to blended. If I submitted a request to change on the original survey, do I need to complete the new survey?

Yes. The original survey was for changes in the first semester. That process is complete, and that list is no longer in use. The new survey is to change your child’s method of instruction for the second semester.

Since you’ve started a new survey, will I lose my place in line?

The list from the original survey is no longer in use, and the list from the new survey will be the only list consulted going forward. As long as you complete the survey on or before October 16, your request will be granted.

What if I submitted the survey for the spring semester, but I have changed my mind?

You may submit a new survey on or before October 16th with your final selection. We will use the last submission before the deadline to place your child.

What if I selected to change from virtual to blended school, and I am notified on December 7th that my child is assigned to a school other than our zoned school. Can we choose to stay with virtual?

We will make every effort to schedule students transitioning back to blended school at their home campuses. Once you select blended school, your child’s virtual school seat will be assigned to another student. For that reason, if you selected blended school, your child will only have a seat in blended school.

If my child is assigned to blended school at a school that is not our zoned school, will transportation be provided?

Yes. Transportation will be provided.

I want my child to move from blended to virtual or virtual to blended. How will changing the method of instruction impact my child’s placement in our zoned school in the fall of 2021?

Your selection of method of instruction will have no impact on your child’s placement in fall of 2021. In the event a school exceeds capacity in the fall of 2021, students will be assigned seats based upon the timestamp on the enrollment documents showing the family’s most recent address.
